

Installation Services

For Commercial Charging Stations

Native Smart Charge installation services offer a total end-to-end solution for commercial electric vehicle charging that include site evaluations, installation, and centralized billing to simplify your EV charging. Native Smart Charge installation and Operations & Maintenance (O&M) services include 24/7 customer service through our network of certified maintenance partners, guaranteeing you the best service and the quickest turnaround time.

Installation Pricing Process

1. Pre-site checklist

Customer will provide photos of their electrical panel, subpanel, installation site through the installation web portal.

2. Initial estimate

Native Smart Charge will provide an estimate through this portal, subject to change based on pending site walk.

3. Site walk

If interested in pursuing installation services, a site walk will be conducive to gather

4. Final price

Customer will receive a final quote.

Why Opt for Installation Services?

One-stop shop

Upload documents, receive a quote, and begin the installation process

Quick & simple evaluation

No need for multiple site visits and evaluations. Our team will evaluate your site to determine your best installation options.

Singular accountability

Native Smart Charge will be with you from the beginning of the installation to the end, and will help support your needs entirely.

Streamlined payment

The simplified billing process includes hardware, installation, and electrical servicing for streamlined invoicing.

Certified installation partner

Native Smart Charge's installation and maintenance partners are certified and guarantee high quality installation of AC and DC fast charging equipment. *DC fast charging equipment require a certified installer to guarantee warranty coverage.

Save with eligible incentives

Native Smart Charge makes sure you're benefiting from all applicable incentives and rebates when creating your estimate to help you save on your EV charger installation.
